THIS INCREDIBLE VIRUSES

VIRUSES are the most mysterious creatures of our planet and now everyone is interested in them. This encyclopedia provides simple but accurate answers to serious and urgent questions. Children and their parents will learn: What viruses are and how did people know about them? Can viruses be useful to us? How to protect yourself from viruses? How to behave during a viral illness?

All the information of the book is scientifically reliable and up-to-date due to cooperation with a scientific consultant — microbiologist O. P. Livinska.

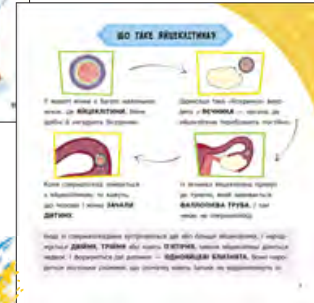

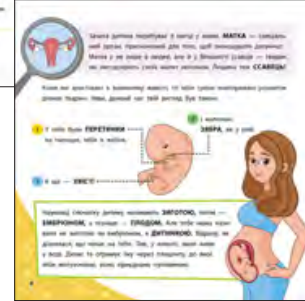

HOW ARE WE BORN INTO THE WORLD

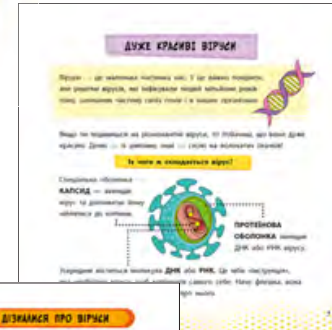

BIRTH is the greatest miracle of the world. The encyclopedia provides answers to the most common children's questions about pregnancy and childbirth. What happens after dad and mom meet each other? How a baby is born and what awaits the family when they have a child? What are newborn babies and how do they feel?

The author knows how to talk with children on a topic that still remains difficult and "inconvenient" for many parents.

ТРАВЕНЬ

Ведмедик навшилкинці походжав лісовими стежинками. Прислуховувався, як проростає трава, як шерхотять молоденькі листочки. Підслухував солов'ям, збликам та дроздам. Часом принохувався, до яких квітів поспішають бджоли.

— Море! Море! — залунали неподалік.

Ведмедик обійшов ялинку і побачив на галлявині щасливого їжачка.

— Поглянь, Ведмедіку, що я знайшов!

Ніжний, трюм теплий аромат паував над перловими дзвіночками, яких росло стільки, що, здавалося, не було їм кінця-краю.

— Це ж справжнє конвалієве море, — замріяно промовив їжачок.

Ведмедик теж глибоко вдихнув повітря, заплющив очі й... нарешті вигукнув:

— Ой! Їжачку, якщо ти справді так любиш море, то милуйся, будь ласка, хугіші!

— Чому хугіші? — здивувався їжачок.

— А тому... — і Ведмедик розкрив другий свою ташницю: він знав, де є ще одне море... Величезне-превеличезне кульбабове море. Але треба поспішати! Якщо вітер скупавється в ньому першим, то воно полетить і друзям доведеться чекати до наступного року.
